

Continuous Glucose Monitoring System (CGMS)

System Architecture & Safety Design

1. System Context

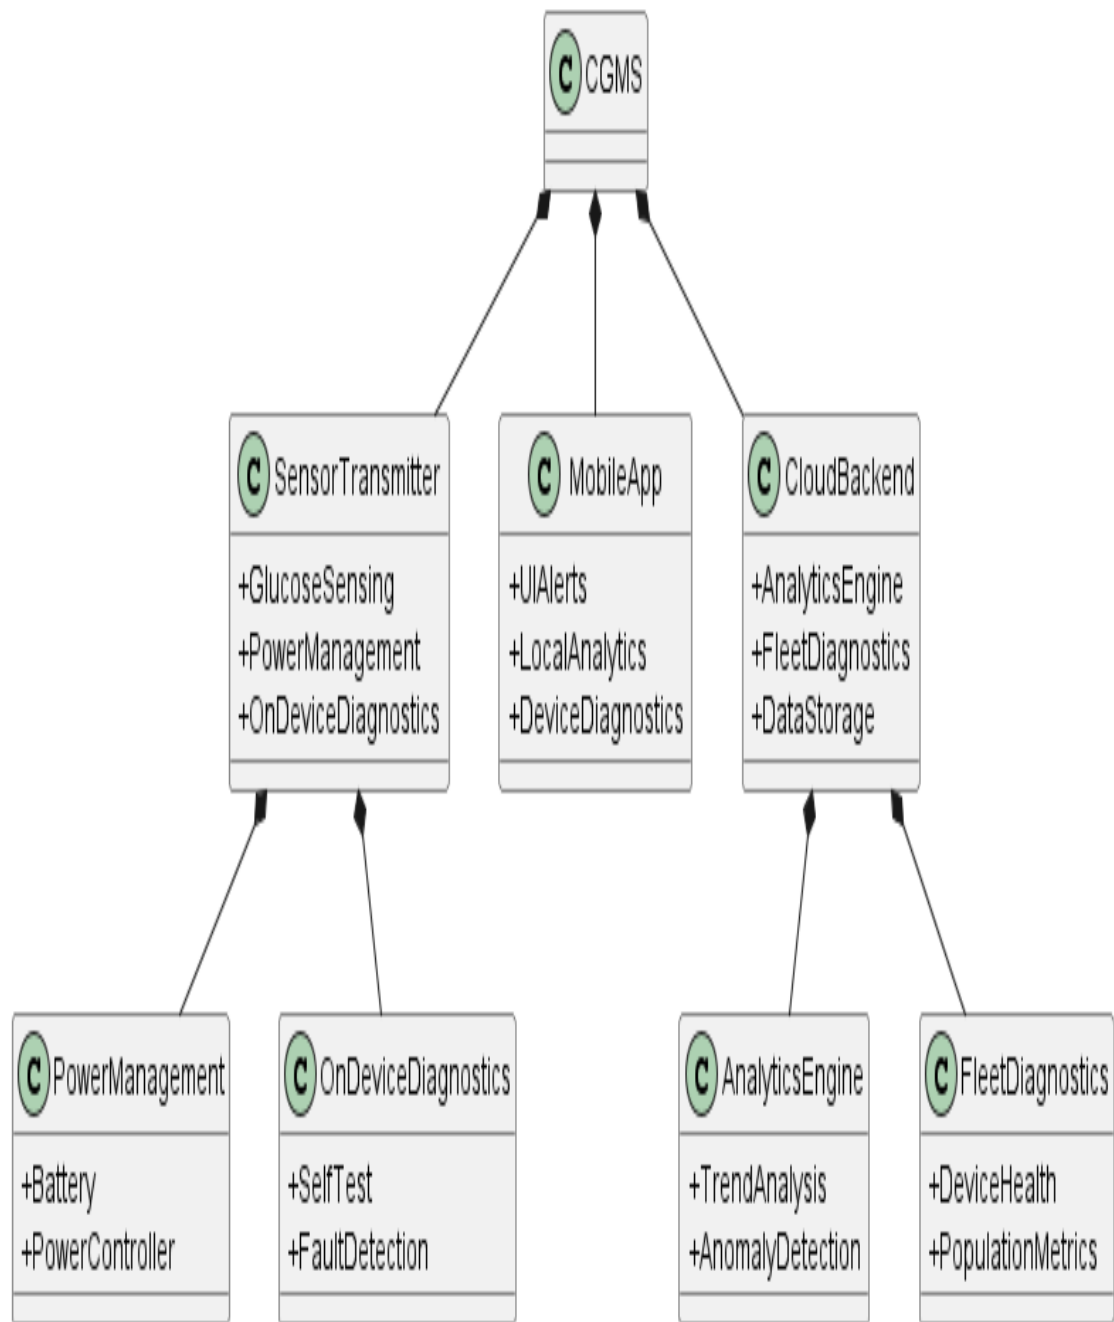

System Context

2. System Architecture (SysML)

2.1 Block Definition Diagram

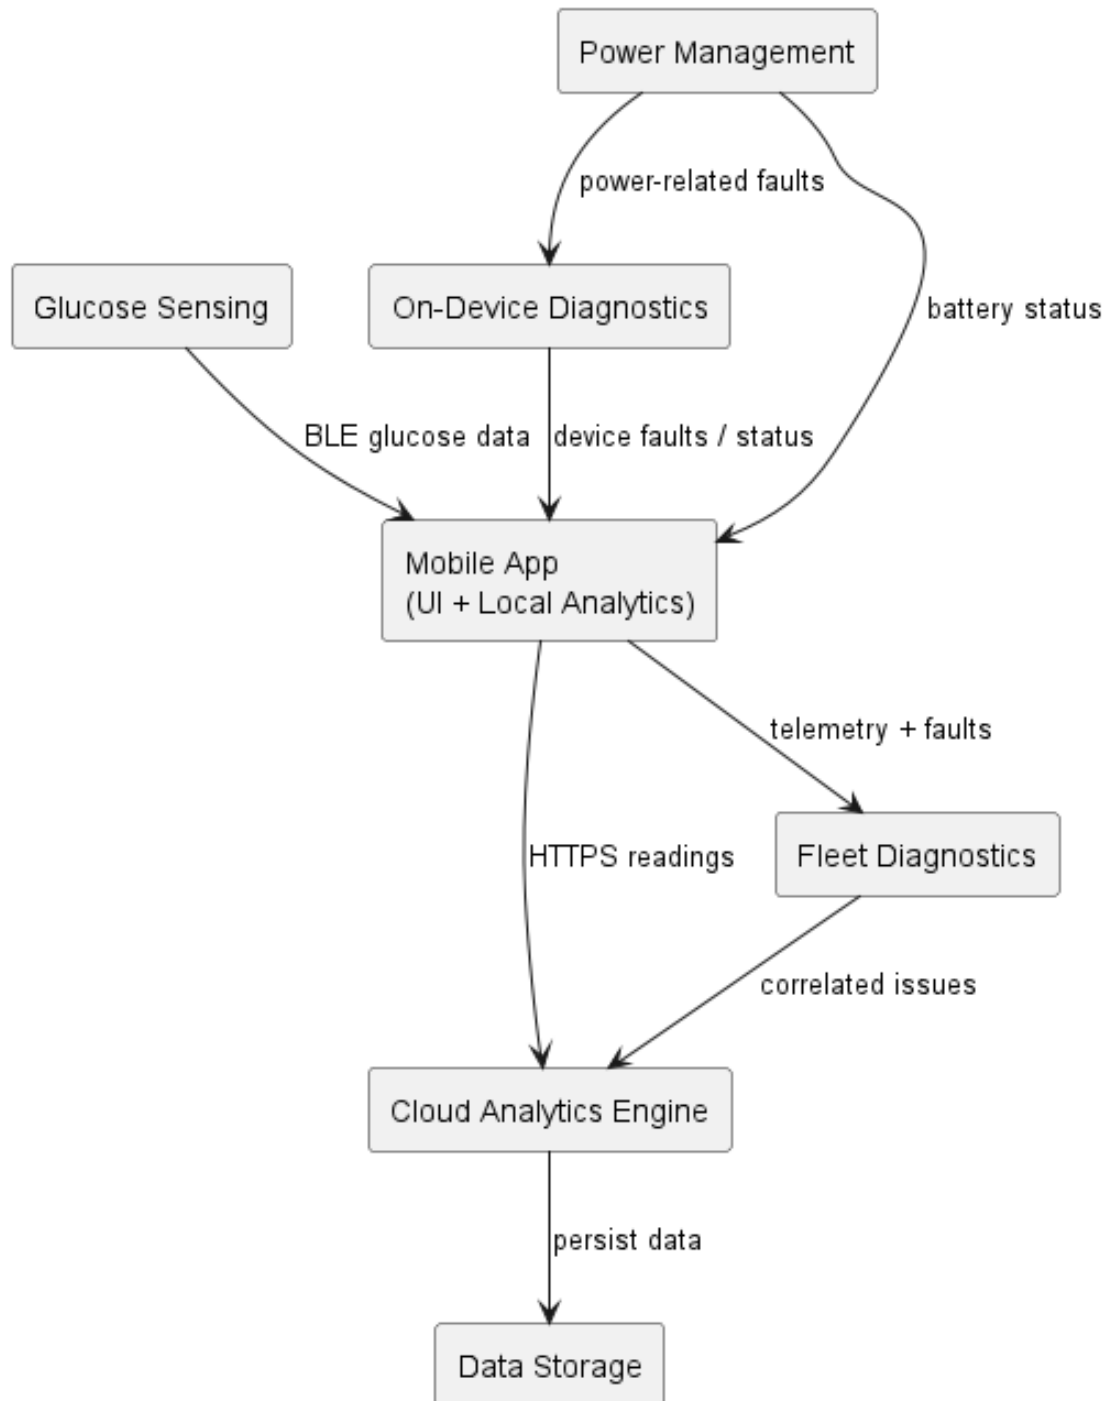

CGMS - Block Definition Diagram (BDD)

BDD

2.2 Internal Block Diagram

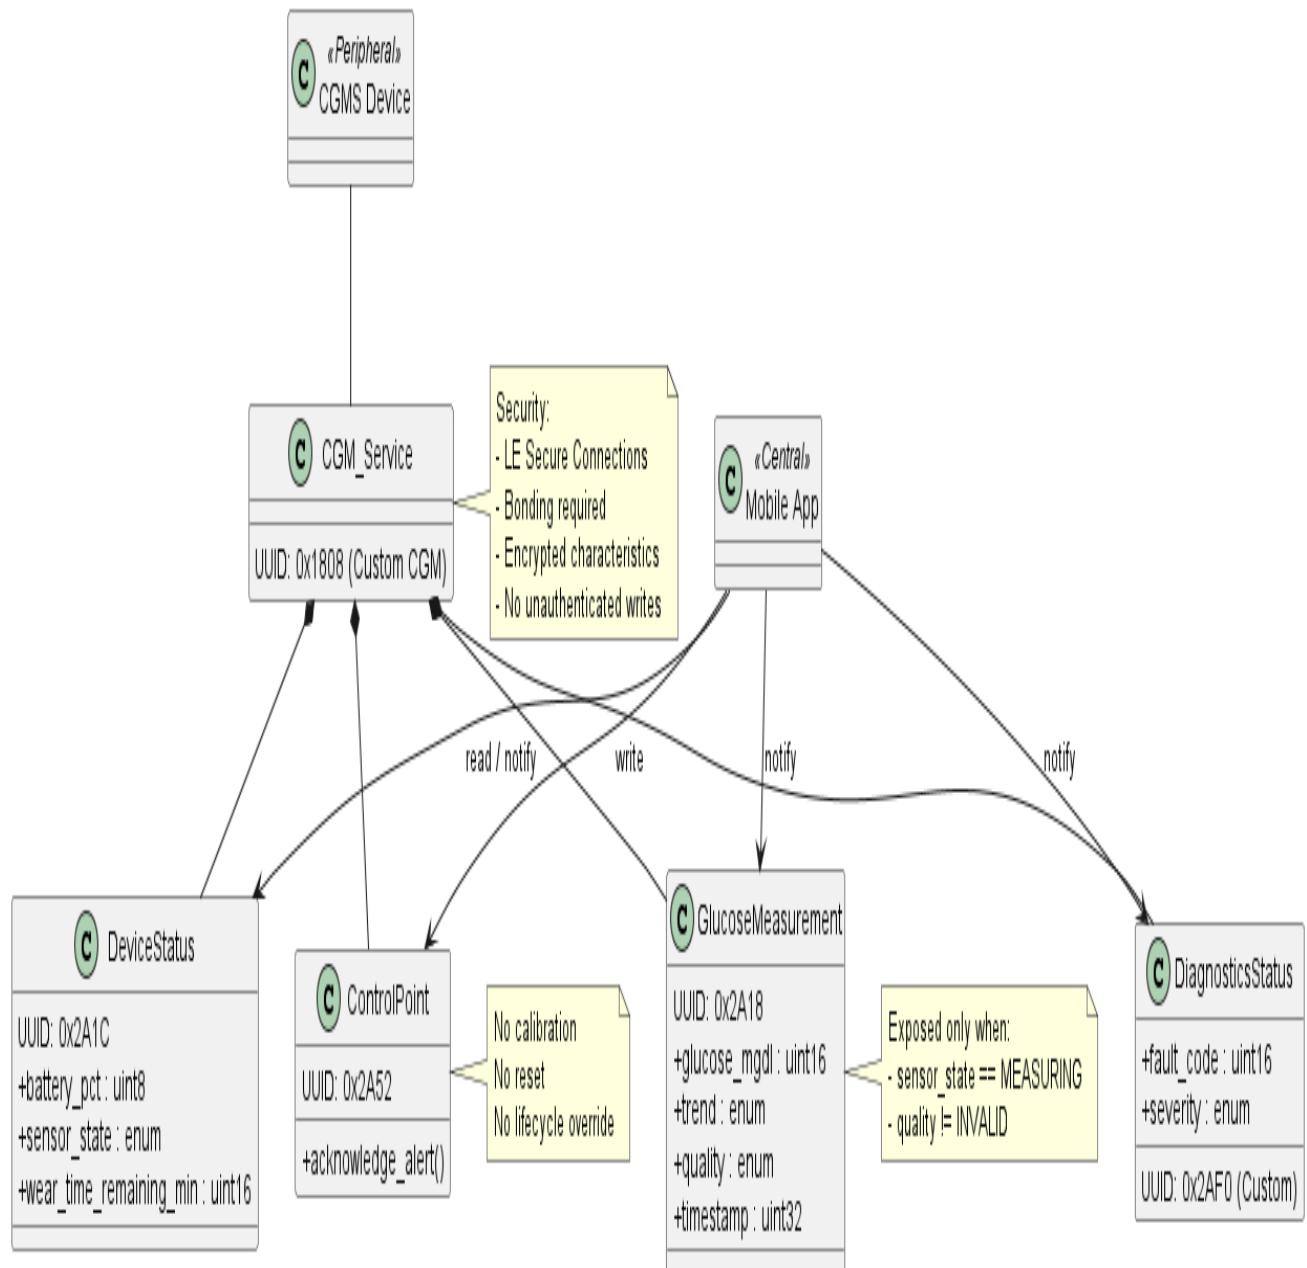

CGMS - Internal Block Diagram (IBD)

3. Interfaces

3.1 BLE GATT Interface

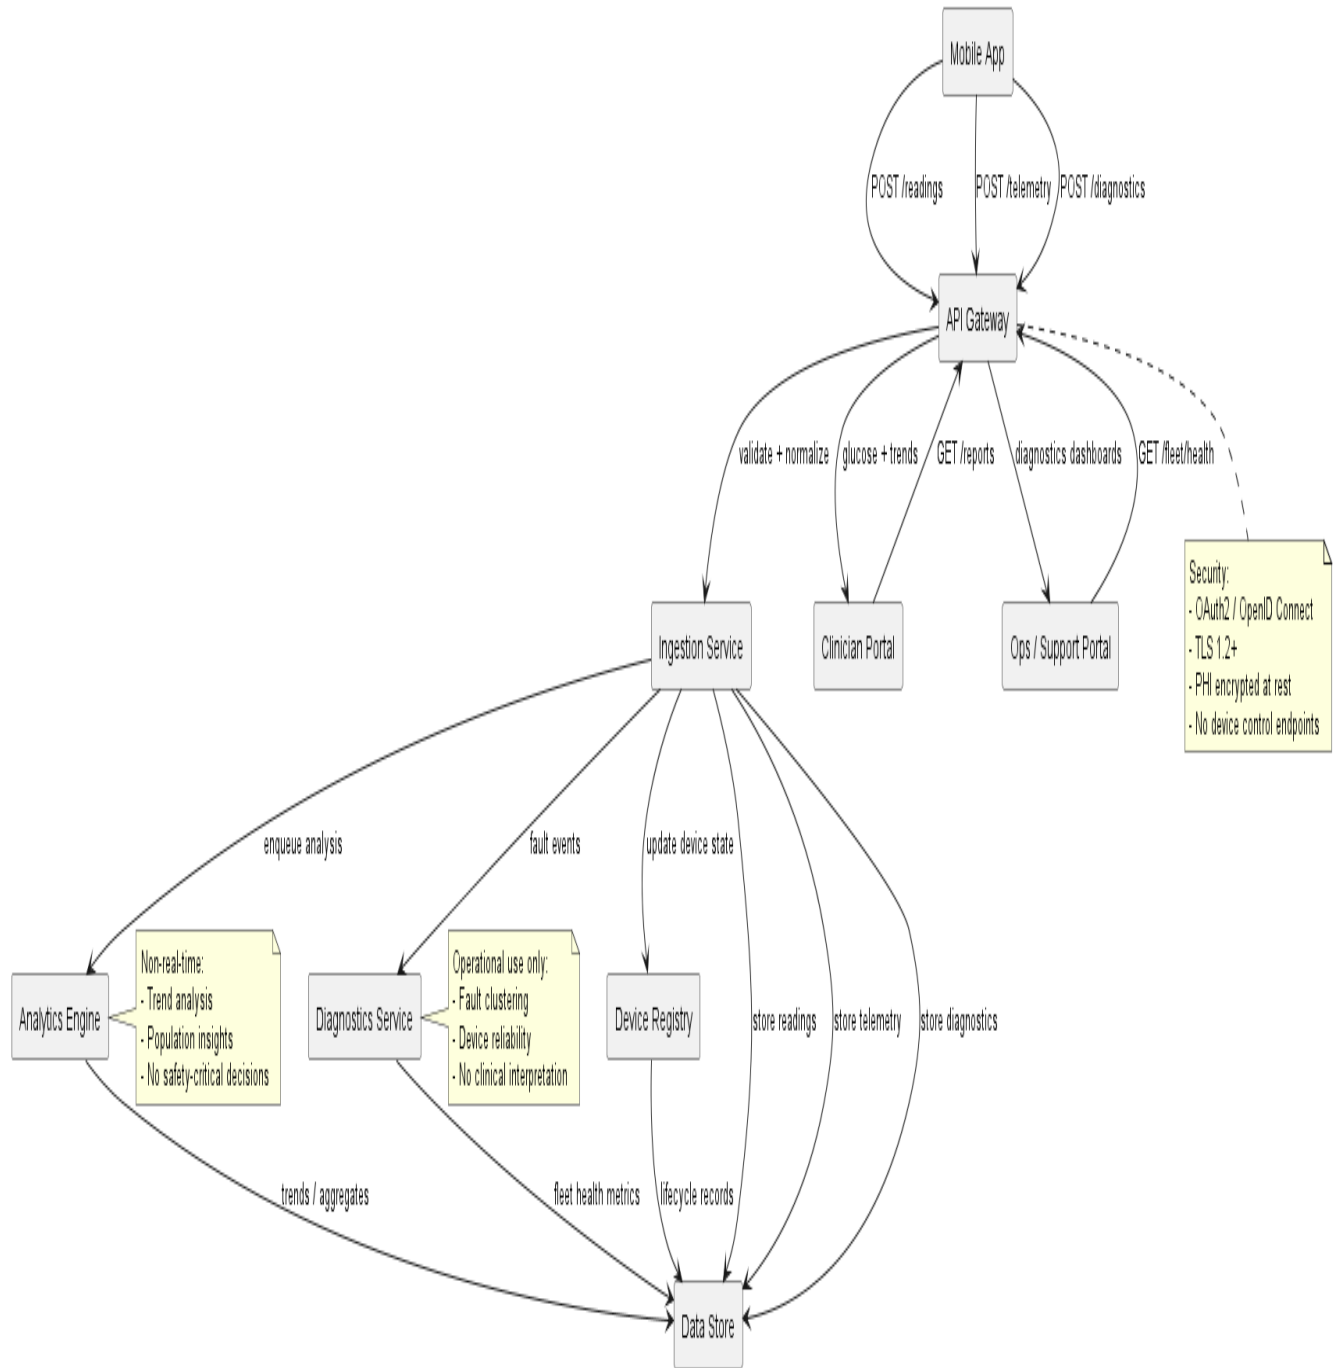

CGMS BLE GATT Profile (Single-Use Sensor)

BLE GATT

3.2 Cloud API Interface

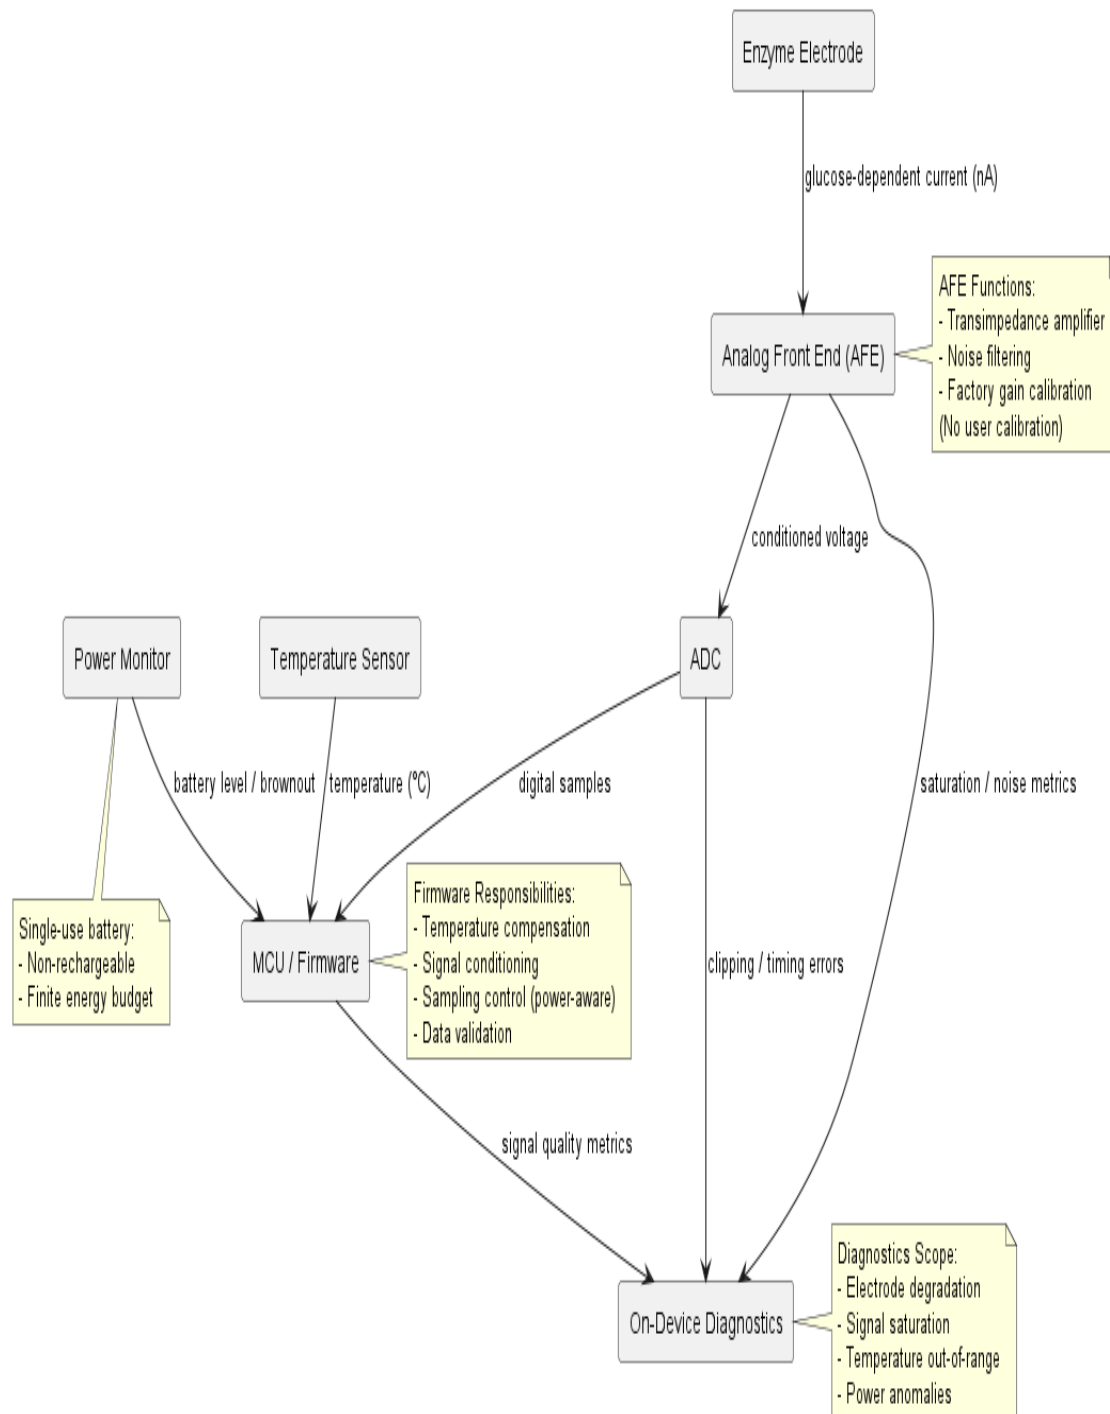

CGMS Cloud API Interface (Updated)

Cloud API

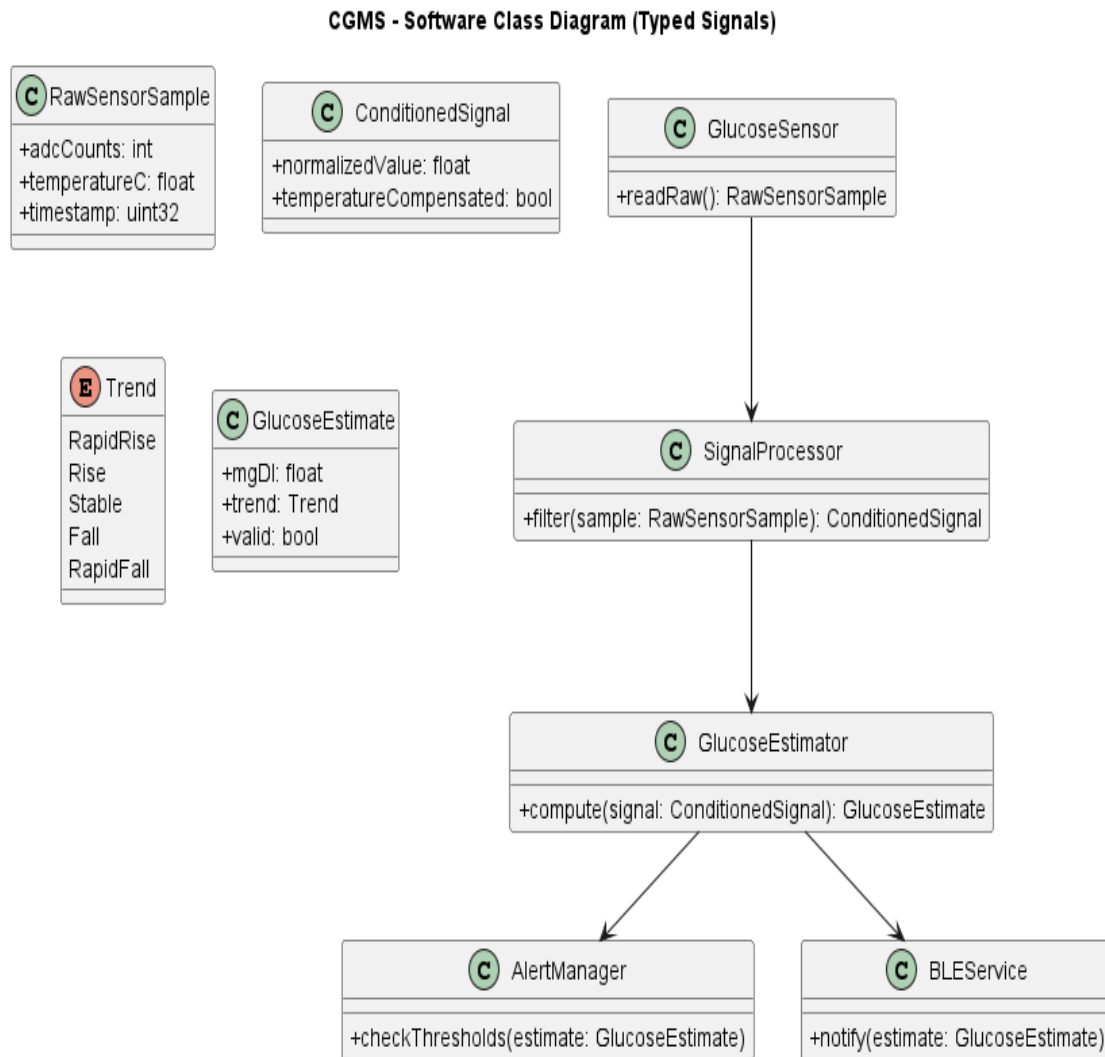

3.3 Sensor Interface

CGMS Sensor Interface (Updated)

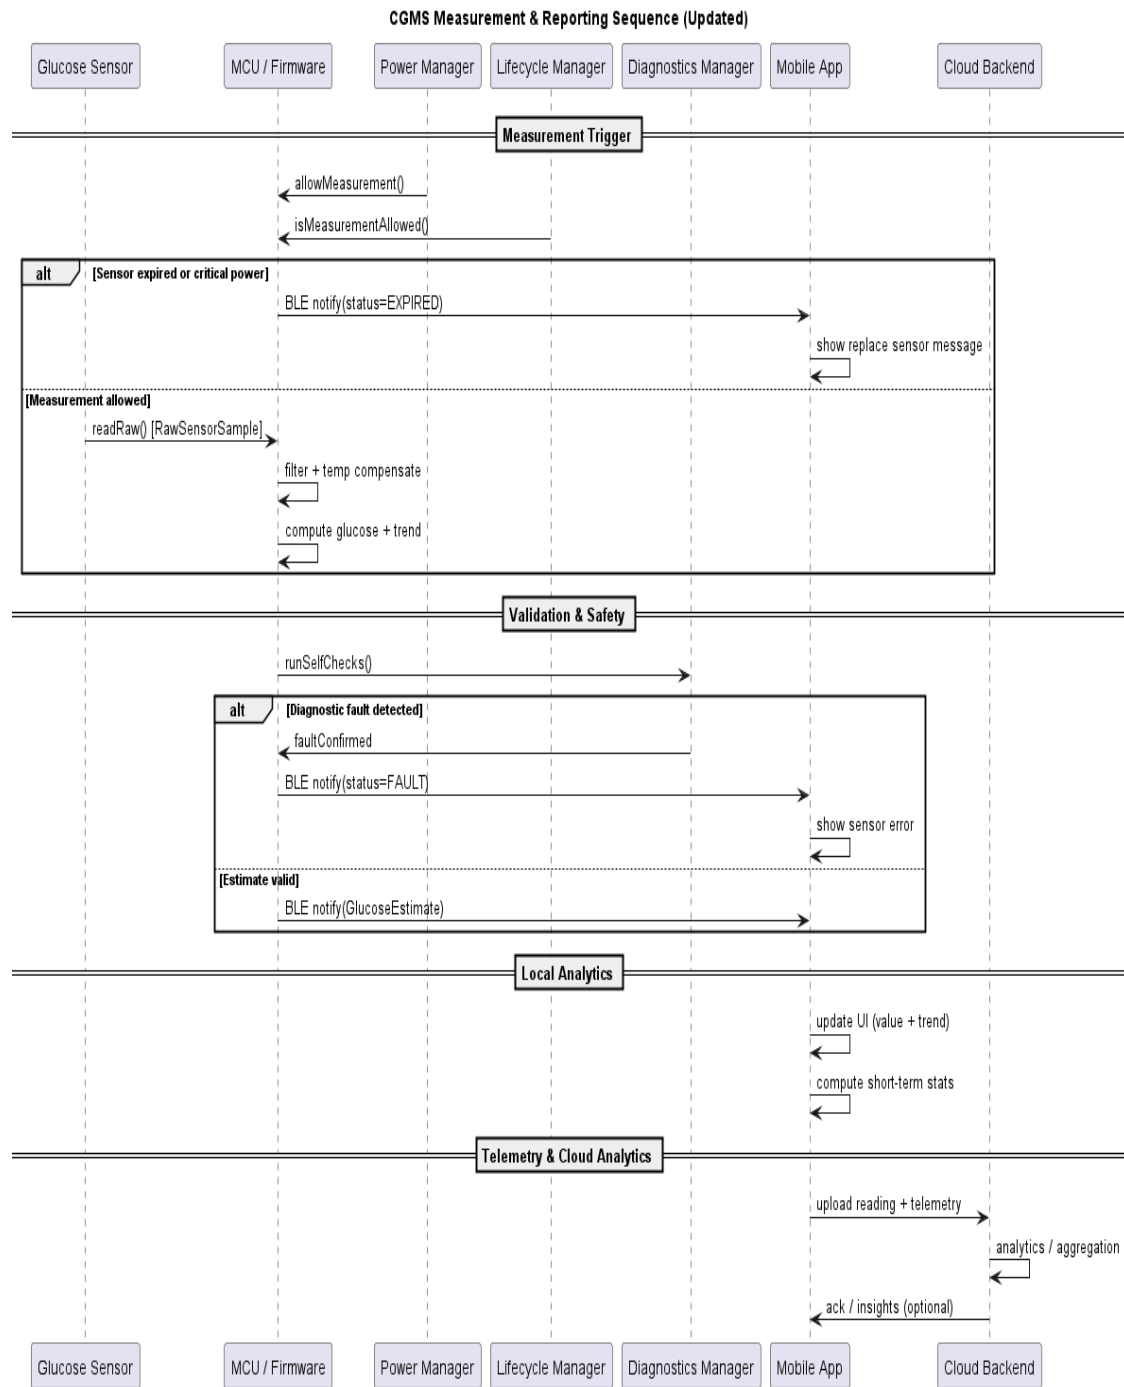

4. Software Design (UML)

4.1 Class Diagram

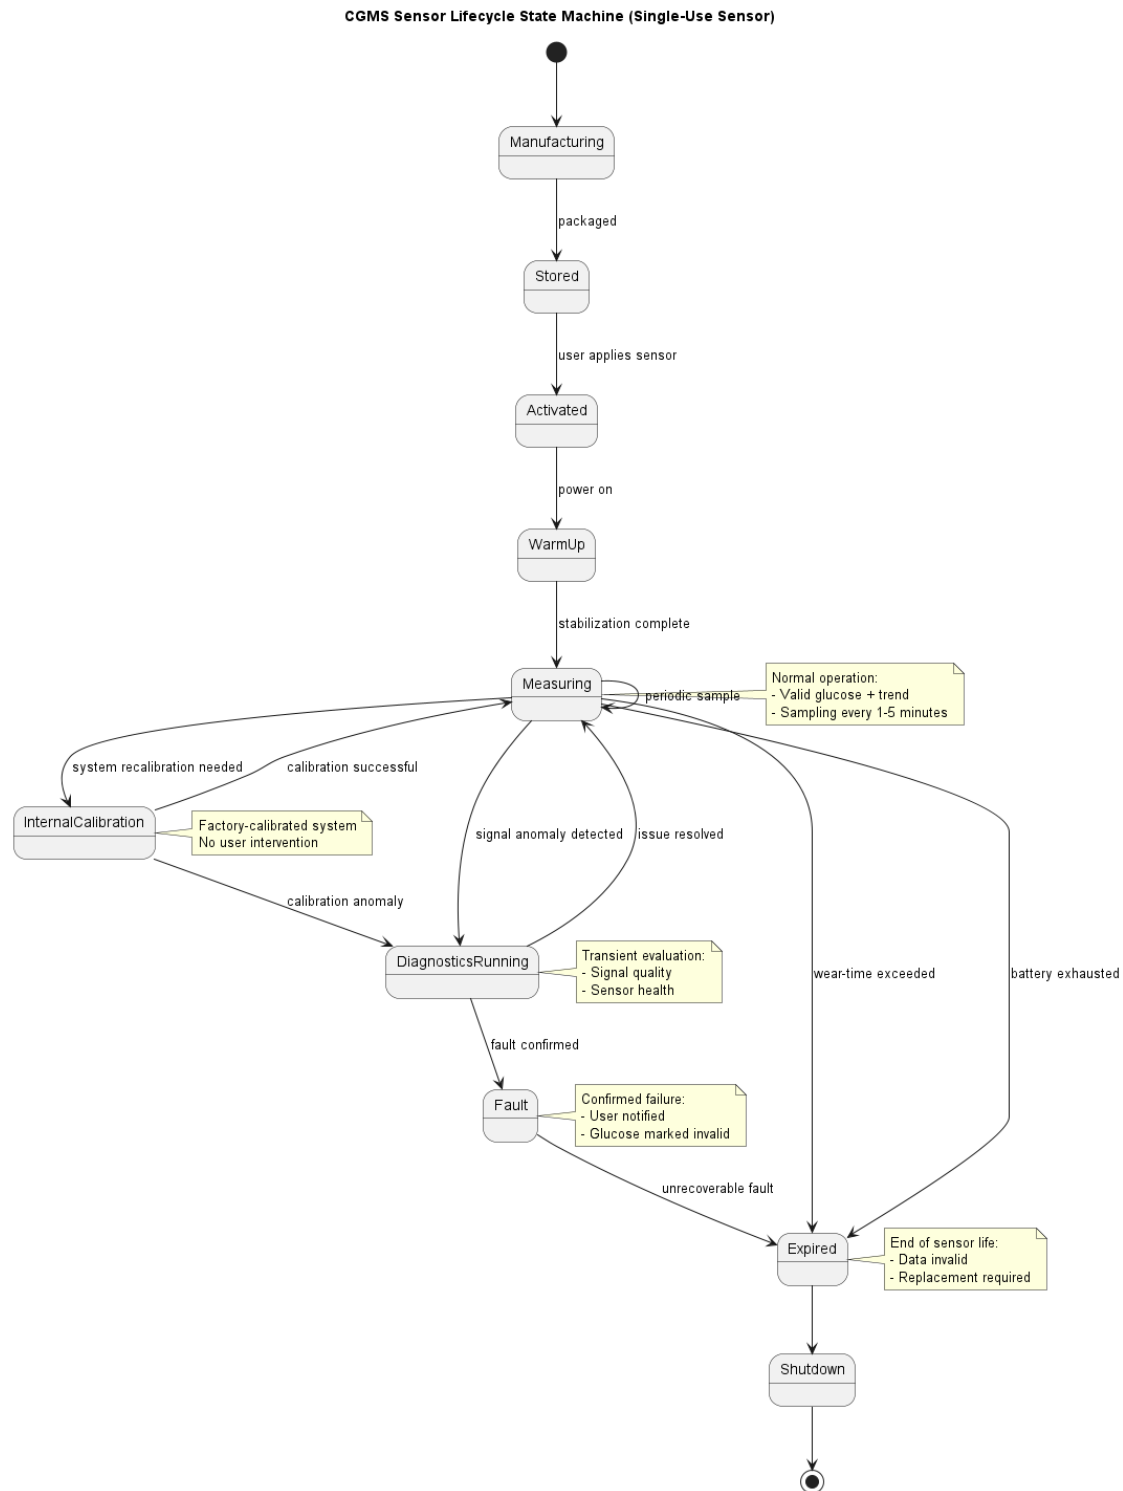

Class Diagram

4.2 Sequence Diagram

Sequence Diagram

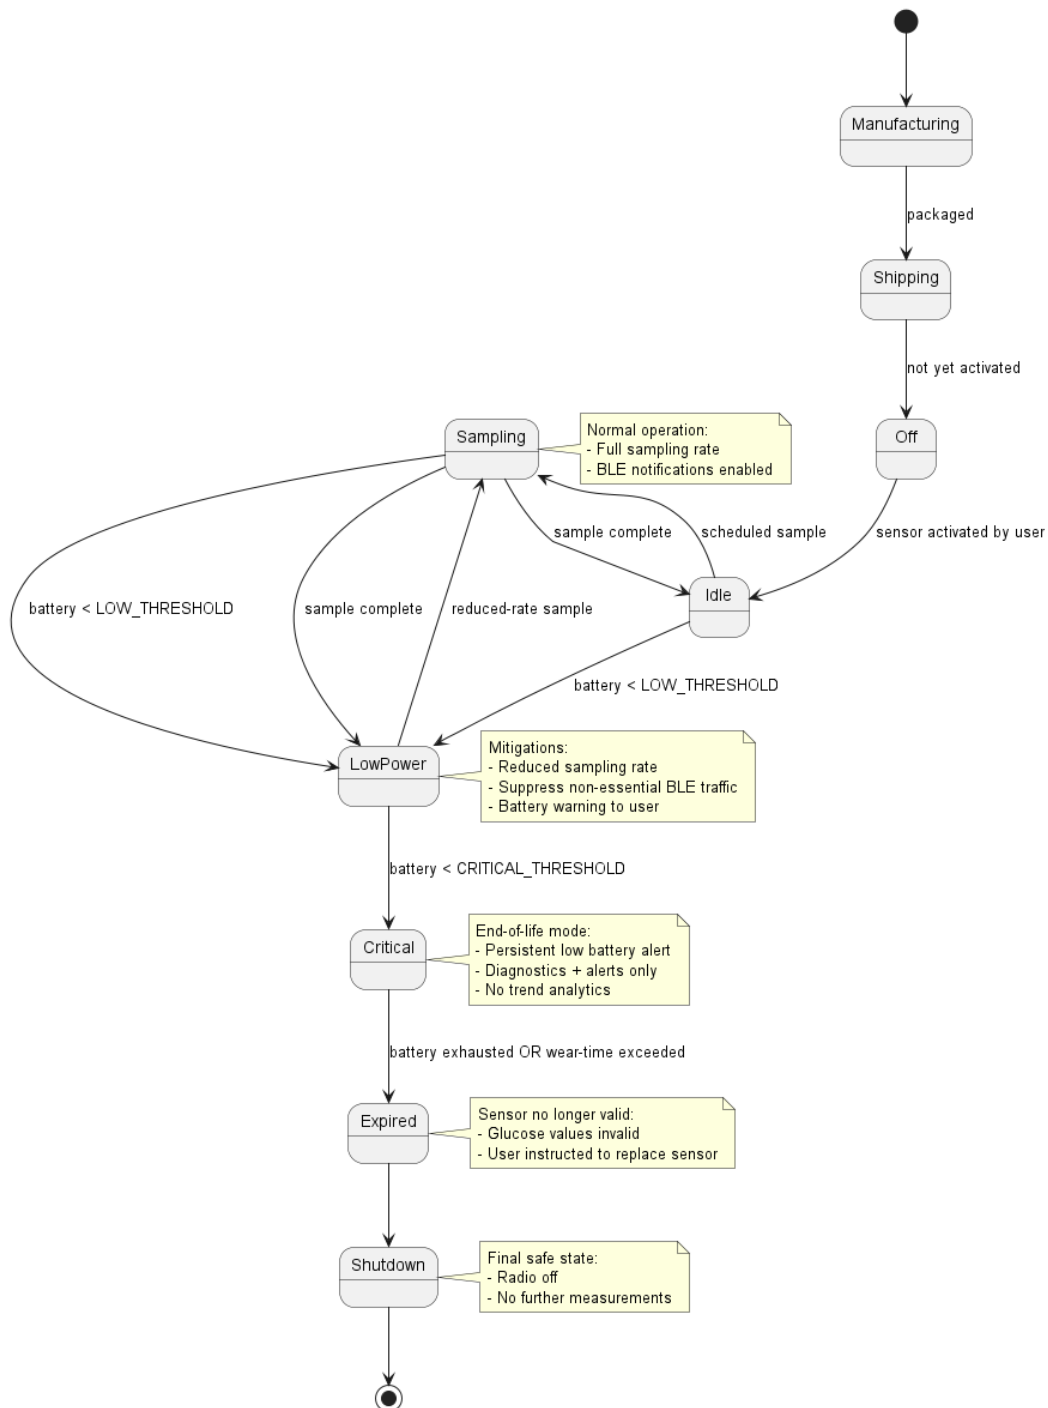

4.3 Sensor Lifecycle State Machine

Lifecycle State Machine

4.4 Sensor Power State Machine

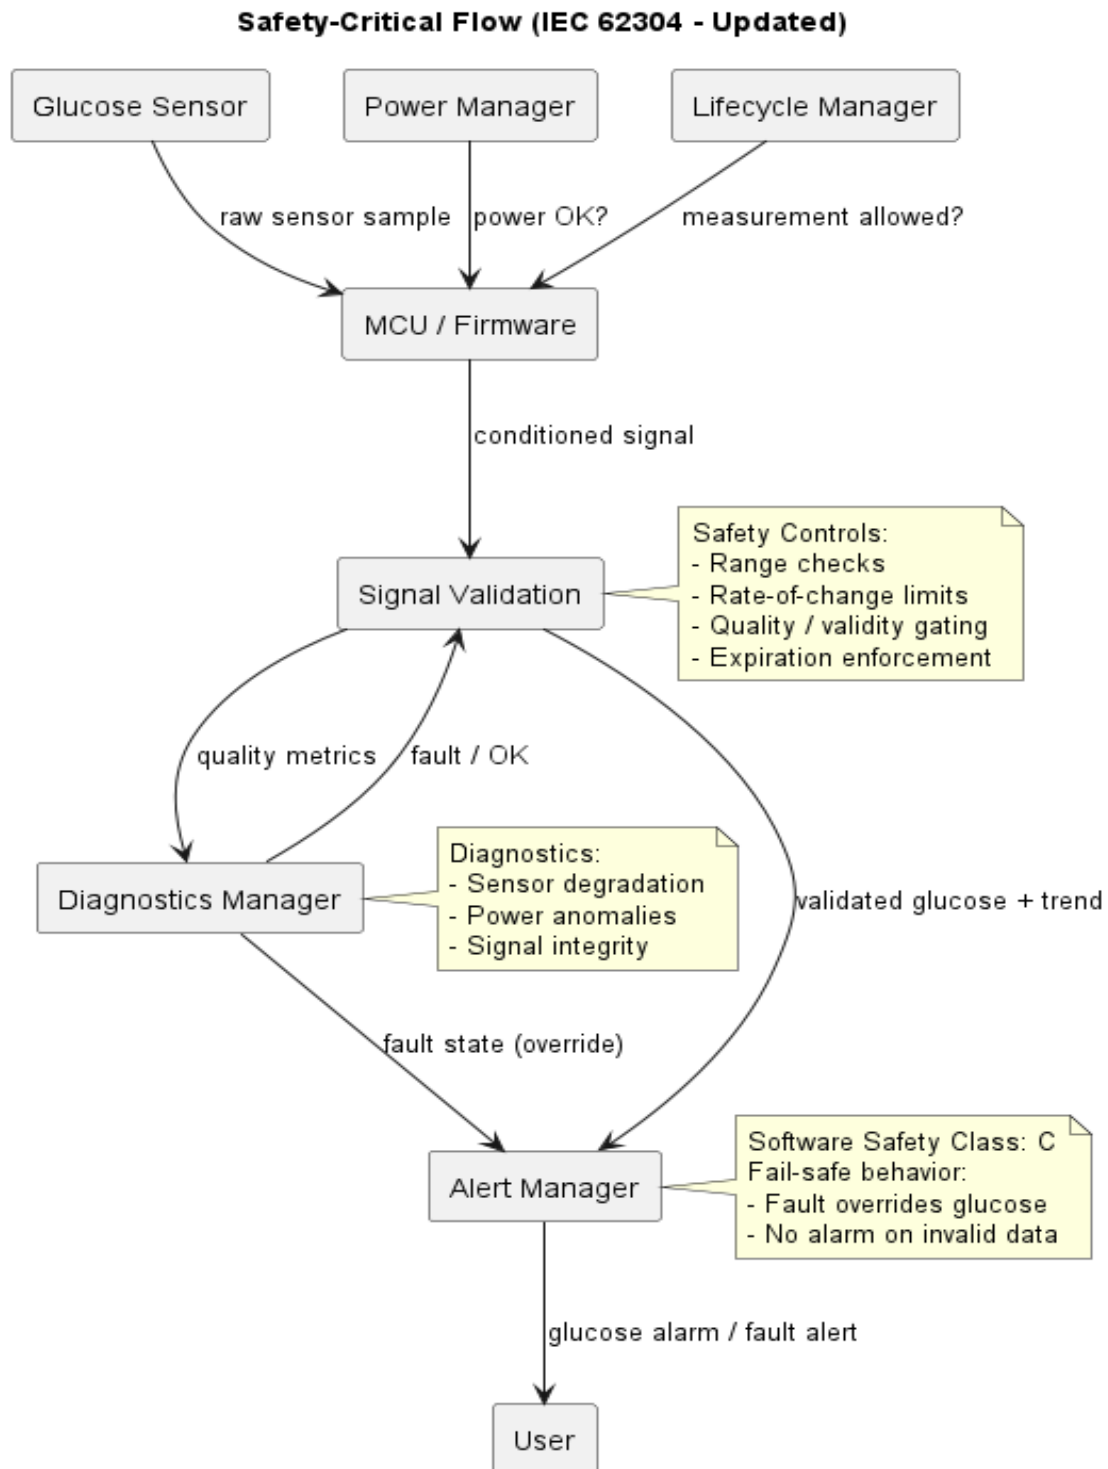

CGMS Power Management - Single-Use Sensor (Non-Rechargeable)

Power State Machine

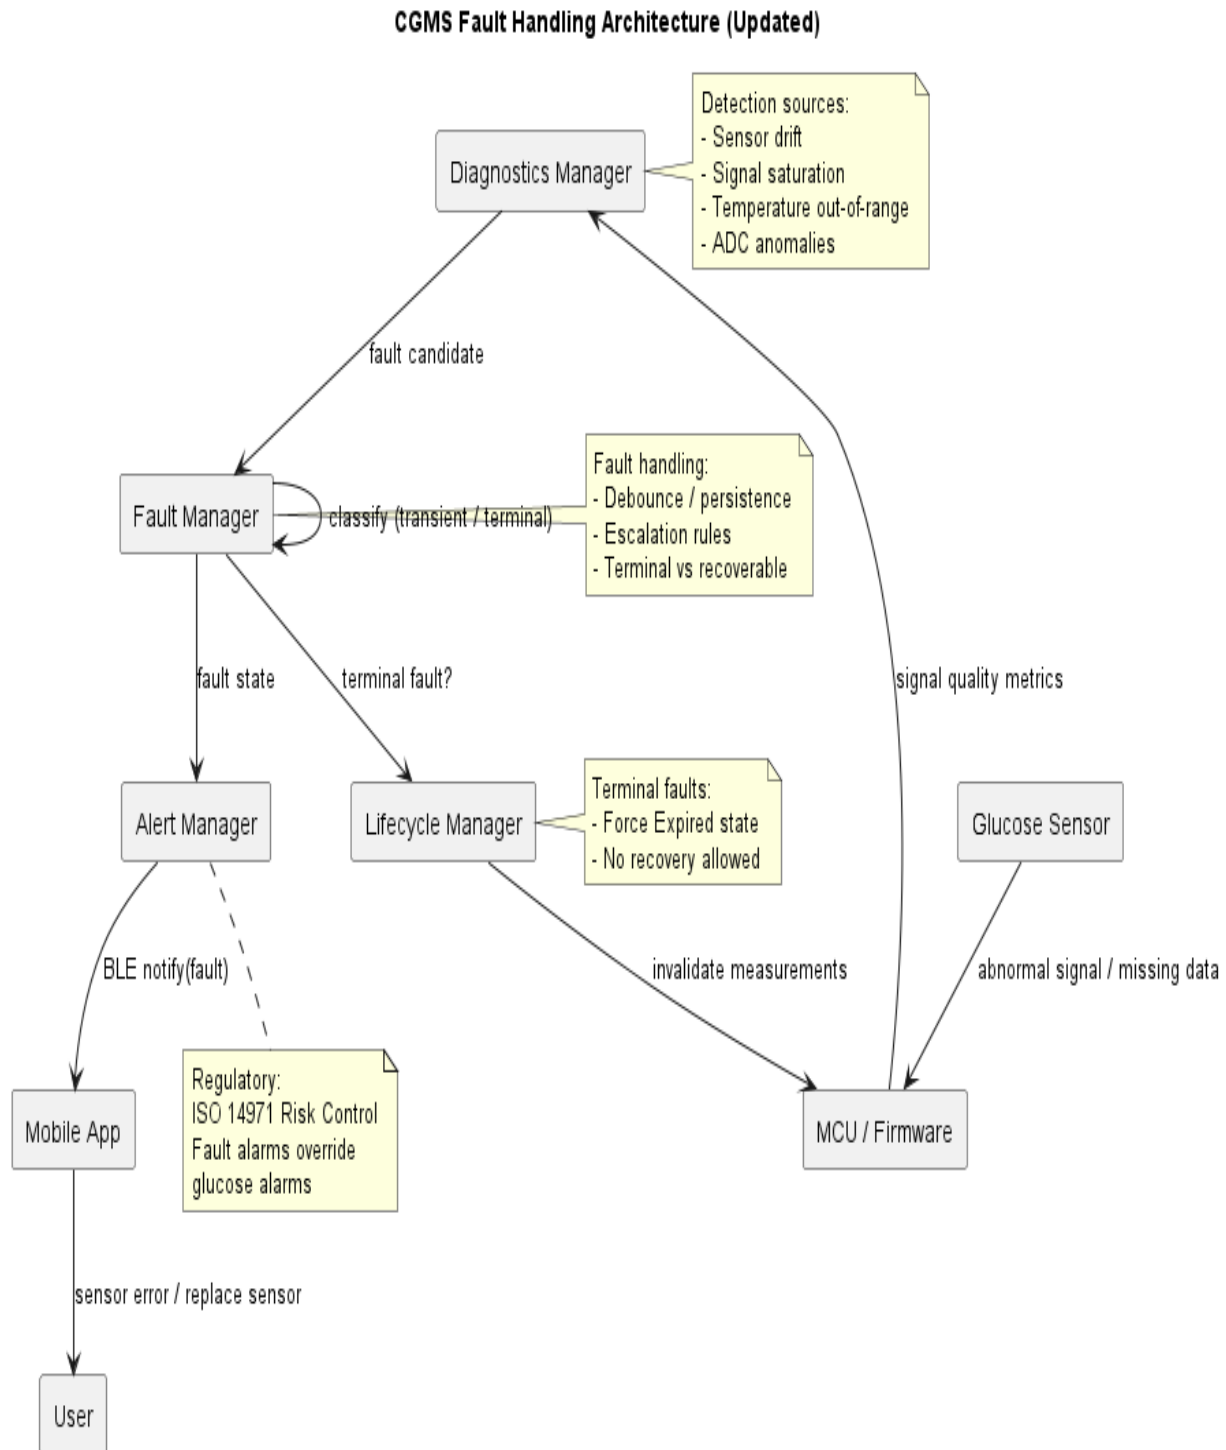

5. Safety & Risk Management

5.1 Safety-Critical Data Flow (IEC 62304)

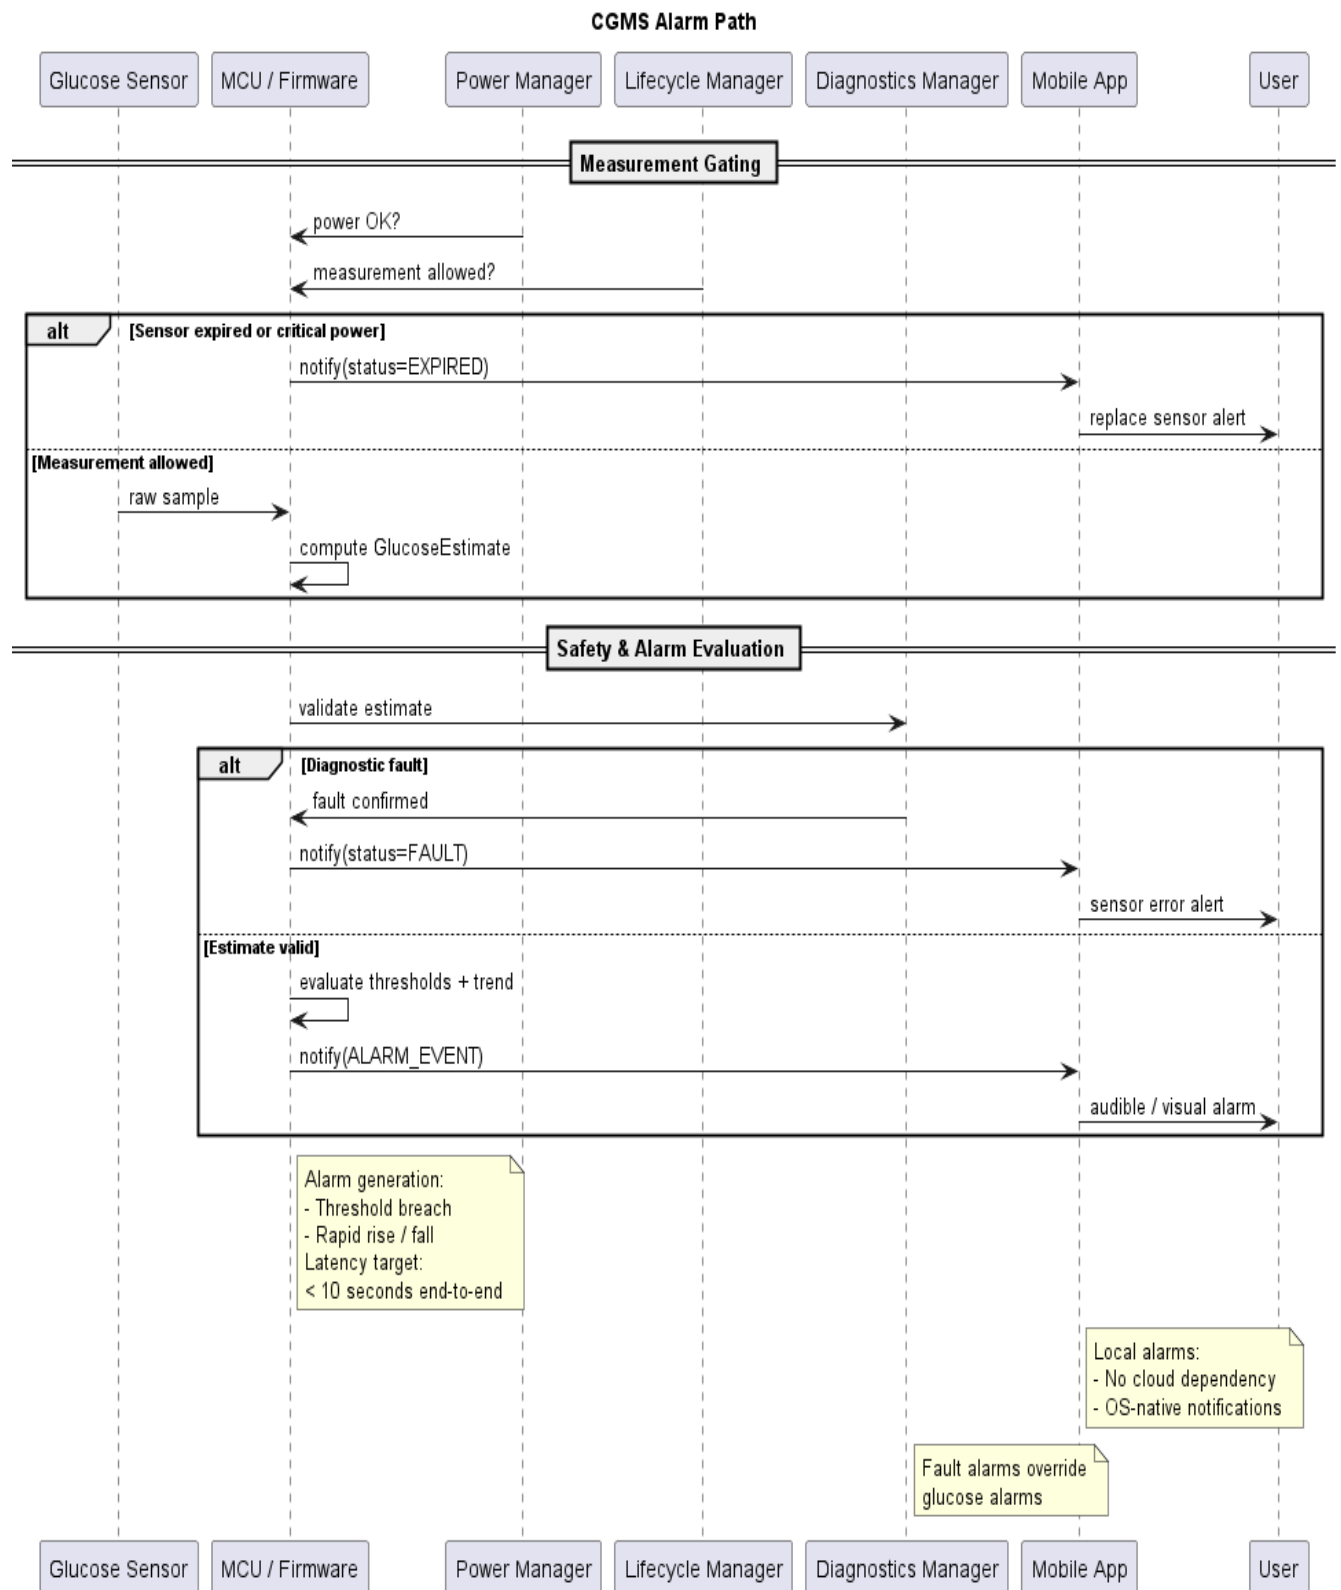

Safety Flow

5.2 Fault Handling

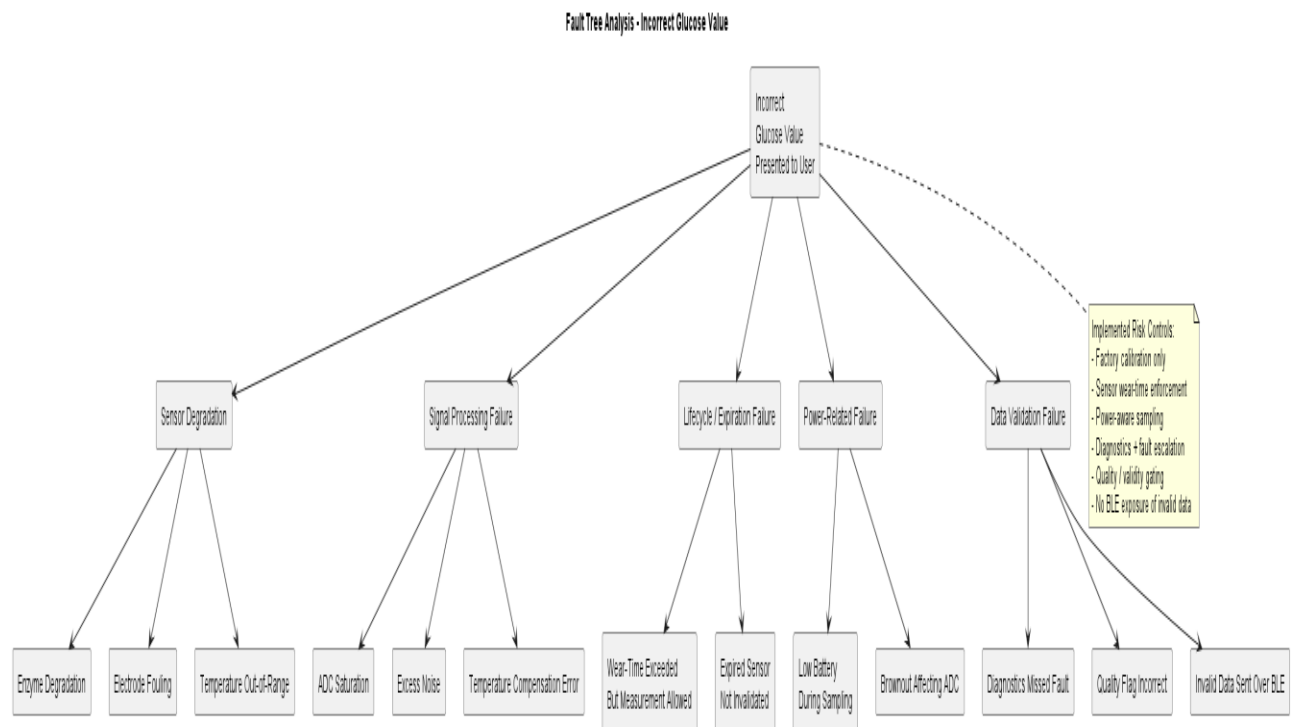

Fault Handling

5.3 Alarm Path

Alarm Path

5.4 Fault Tree Analysis (ISO 14971)
